

**ADVISORY COMMITTEE TO THE
CONGRESSIONAL
INTERNET CAUCUS**

STATE OF THE NET
Conference
&
Kickoff Technology Policy Exhibition

**SAVE THE DATE
WEDNESDAY, JANUARY 30, 2008**

Don't miss the largest technology policy conference and longest running annual technology exhibition hosted on Capitol Hill. The annual conference brings technology and the Internet to the forefront of the policy debates, featuring experts that can parse through the technical and complex issues that continue to challenge policymakers and analysts.

If you need to get your arms around the top technology policy issues and trends that will dominate congressional conversation in 2008, this is your best opportunity. The Congressional Internet Caucus Advisory Committee, a diverse group of public interest, non-profit and industry groups committed to providing educational events, designs each panel to include a diverse set of views and perspectives. State of the Net is the only conference well-recognized for its balanced blend of academics, consumer groups, industry and government.

Directly following the conference, the Technology Policy Exhibition showcases these compelling policy issues with hands-on demonstrations to illustrate how the Internet is changing our lives. The goal of this annual tech exhibition is to bring cutting-edge technology policy demonstrations to Capitol Hill to illuminate the power and flexibility of the Internet as a medium for communications, commerce, and democracy.

For more info and to RSVP visit www.netcaucus.org/events/2008/kickoff/

This is a widely attended event hosted by the Congressional Internet Caucus Advisory Committee (ICAC), part of a 501 (c)(3) charitable organization. The ICAC is a private sector organization comprised of public interest groups, trade associations, non-profits, and industry leaders. The diversity of ICAC membership ensures that all educational events and initiatives are fair and balanced forums for Internet-related discussion. The ICAC does not promote any particular policy position.
